**REPREVE**

Repreve® nylon is made entirely from pre-consumer fiber waste, making it one of the most earth-friendly fabric ingredients you'll find anywhere. The proprietary Repreve process took years to develop and is third party certified for recycled content. The production of Repreve nylon conserves energy and natural resources by offsetting the need to produce virgin nylon fiber, creating a reprieve for the planet. Repreve and It's What's In It are trademarks of Unifi, Inc.

The Facts icon indicates that a textile has been evaluated based on the requirements of the multi-attribute sustainability standard NSF/ANSI 336 through an independent third-party certification body authorized by the Association for Contract Textiles.
